

Blucube CXCL-650-S in-ceiling loudspeaker (single stereo)

The CXCL-650-S is single stereo version of the high performance CXCL-650 speaker pair.

The two-way driver design features the same Kevlar bass/midrange driver cone coupled with pivoting titanium tweeters and high quality crossovers create a very crisp and controlled sound.

The clean looking magnetically attached, rimless flat grilles is a strong feature of this high performance single stereo speaker.

The twin voicecoils and tweeters produce a stereo sound image from a single in-ceiling speaker.

Ideal for use in smaller rooms, such as bathrooms.
